easySRI aims to enable a smooth and extendable web platform that offers services for the automated calculation of the SRI according to the final report of the European Commission DG Energy ENER that will act as a basis for an effective implementation of the SRI and allow further testing at Member State level.

Building on the progress made, we are now advancing toward project completion.

The easySRI platform has open access for SRI assessments

We are excited to introduce the easySRI web platform — designed to make Smart Readiness Indicator (SRI) assessments faster and more accessible. Within this platform users can complete assessments directly on-site using a smartphone or tablet. The step-by-step interface ensures a clear and structured process, helping users to efficiently collect and submit the necessary information.

The easySRI platform is fully aligned with the official SRI methodology and supports consistent, high-quality assessments. Whether you are evaluating a single building or managing multiple projects, the platform streamlines workflows and reduces administrative tasks.

Joint Event & Final SRI-ENACT Project Conference

Joint Event & Final SRI-ENACT Project Conference, scheduled for 7 May 2025, from 9:00 to 17:00 CET. The event will be held both in-person in Brussels

(Comet Meetings Louise) and online. The morning session will feature the SRI Platform's 6th plenary meeting, organized by the European Commission DG Energy & CINEA, while the afternoon will focus on the SRI-ENACT project's final conference with expert presentations and discussions. An SRI projects exhibition will be available throughout the day, showcasing initiatives like SRI-ENACT, Smart², SRI2Market, and easySRI.

SRI Projects in Sync

We are actively collaborating with our sister projects—SRI-ENACT, Smart², and SRI2MARKET—to make the most of our shared goals and expertise. Each project has its own specific focus, but together we're working to create synergies that strengthen the overall impact of our work. To support this collaboration, a centralized data hub has been developed, allowing us to align efforts and share insights more effectively.

Improving and Demonstrating the Potential of SRI

The 5th Plenary Meeting in Delft

The easySRI consortium met in November 2024 in Delft, The Netherlands for the fifth plenary meeting. As the project nears completion, the different work packages and tasks are coming together smoothly. The meeting was hosted by DEMO Consultants.
